---

March 2022 —  
March 2023  
1 year 1 month

### Coherent Solutions Poland

Wrocław, Poland

#### Frontend developer

Project - client's flagship product, #1 enterprise backup and recovery solution that covers workloads across various environments such as physical and cloud.

##### Responsibilities:

- Perform the migration of a legacy JavaGUI application to a web-based solution
- Develop new user interfaces and ensure cross-browser compatibility
- Coordinate closely with backend developers and business analysts to ensure seamless front-end integration and functionality

**Technologies:** Angular 13, Angular Material, RxJs, SCSS, JavaGUI, REST Api

May 2019 — March  
2022  
2 years 11 months

### ISsoft Solutions

Minsk, Belarus

#### Frontend developer

Project/client - an American clothing and home decor retailer. The project was based on updating and maintaining the website for thousands of storefronts on the base of hybris (SAP) platform.

##### Responsibilities:

- Improve the UI for existing functionality and creating new responsive layout based on ready designs, perform code review, refactoring, bug fixes
- Demo sessions for the client at the end of each sprint

**Technologies:** Angular 10, HTML, CSS, JavaScript, jQuery, LESS REST API

## Frontend developer

Project/client - a leading innovator of Multiple Listing Service (MLS) technology. Our team was maintaining a system for providing information about apartments, houses and land for brokers and realtor agencies in the US.

### Responsibilities:

- Develop and maintain client-facing projects, enhance existing functionality to improve user experience and system performance.
- Conduct code reviews, perform refactoring, and resolve bugs to maintain high-quality code standards.
- Collaborate closely with a team of developers and client-side managers to ensure alignment on project requirements and deliverables.

**Technologies:** JavaScript, HTML, CSS, jQuery, SQL, custom programming language (SpiderMonkey-based), custom UI library (Bootstrap-based)

June 2017 — May  
2019  
2 years

## Invatechs Software

Minsk, Belarus

### Junior Frontend developer

Started as an intern, and after a few months, transitioned to a Junior Frontend Developer role.

### Responsibilities:

- Collaborate with the development team to design, implement, and test new features, focusing on both WordPress-based and React-based applications.
- Improve UI components based on mockups and client feedback, fixing bugs and enhancing user experience.
- Assist in documentation creating, version control, and communication with client development teams to ensure smooth project delivery.

**Technologies:** JavaScript, React.js, Redux, HTML, CSS, Git, Jira, MongoDB, REST API, Recompose, Wordpress (LAMP stack)
